

To address the new graduation requirement of an online experience and to strengthen the learning process, additional technical instructional resources are desired. The State Department of Education is looking for a single vendor to provide interactive online learning modules. The interactive online learning modules are for health science and automotive programs. The time period for providing the online modules is from October 1, 2009 through September 30, 2010.

The vendor must be CASE certified and must provide an interactive online automotive training program to 100 schools with an unlimited number of individual student licenses for students who are enrolled in auto service technology and collision repair programs at these schools for one year. All of the following must be included:

- Unlimited access to online modules 24/7 at school and/or at home.
- Modules covering the following areas as a minimum:
  - Engine Repair
  - Manual Drive Train and Axles
  - Suspension and Steering
  - Brakes
  - Automotive Electrical/Electronics
  - Automotive Heating, Ventilating, and Air Conditioning
  - Engine Performance
  - Safety.
- Toll free technical support for instructors a minimum of 12 hours per day, 7 days a week.
- Learning Management System that facilitates instructor control and access to data, including the ability to
  - View student progress in modules
  - Examine individual student tests
  - Record and export test and quiz results
  - Re-set quizzes and exams.
- Teacher resources including printable NATEF current task sheets, student certificates, study guides, and other course materials.
- Initial minimum of one day of training in Alabama for instructor training and update training opportunities as needed through telephone, online, webinar, and/or face to face.
- Administrative access for each instructor and school administrator in that school and for the Career Tech Section of the Alabama Department of Education.
- Access to end of course tests with results reported by school, state, and compared to other states.

In addition to the requirements above, the vendor may provide CD resources for module delivery to supplement the online coursework.

The vendor must provide an interactive online health science training program to 135 schools with an unlimited number of individual student licenses for students who are enrolled in the health science cluster at these schools for one year. All of the following must be included:

- Unlimited access to online modules 24/7 at school and/or at home.
- Modules that align with National Healthcare Foundation Standards covering the following areas as a minimum:
  - Human Body Systems
  - Safety
  - Legal and Ethical Issues
  - Vital Signs.
- Toll free technical support for instructors a minimum of 12 hours per day, 7 days a week.
- Learning Management System that facilitates instructor control and access to data, including the ability to
  - View student progress in modules
  - Examine individual student tests
  - Record and export test and quiz results
  - Re-set quizzes and exams
  - Create class groupings
  - Export test and quiz results.
- Teacher resources including printable student certificates, study guides, and other course materials.
- Initial minimum of one day of training in Alabama for instructor training and update training opportunities as needed through telephone, online, webinar, and/or face to face.
- Administrative access for each instructor and school administrator in that school and for the Career Tech Section of the Alabama Department of Education.
- Access to end of course tests with results reported by school, state, and compared to other states.

In addition to the requirements above, the vendor may provide CD resources for module delivery to supplement the online coursework.
